The breach involved a third party gaining access to a file , which contained personal data for 22 current and past employees, including the passports, employment authorization cards, social security cards and/or immigration Visas for sixteen New Hampshire residents. Circumstances suggest that the access was not specifically targeted at information about individuals. To date, we have not received any reports of actual misuse of information as a result of this incident.

In August 2013, Ektron hired a third party firm to determine the full scope of the breach, including the extent of the employees and former employees affected.

NUMBER OF NEW HAMPSHIRE RESIDENTS AFFECTED

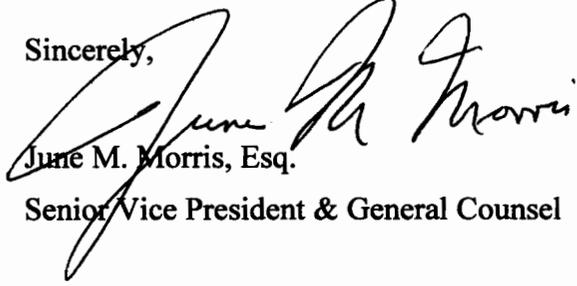

The number of affected individuals residing in New Hampshire is sixteen. These residents will shortly receive notice pursuant to N.H. Rev. Stat. § 359-C.19-21 via postal mail.
