Definitions

A. “Affiliate” means a person who directly or indirectly owns or controls, is owned or controlled by, or is under common ownership or control with, another person. Solely for purposes of this definition, the terms “owns,” “is owned” and “ownership” mean ownership of an equity interest, or the equivalent thereof, of 10 percent or more, and the term “person” means an individual, partnership, committee, association, corporation, or any other organization or group of persons.

B. “Hospital” means any institution that provides any of the following services to patients under supervision of physicians: diagnostic and therapeutic services for medical diagnosis; treatment and care of injured, disabled or sick persons; rehabilitation services for such persons; or psychiatric and substance abuse treatment.

C. “Provider” means any “health care facility” as defined by RSA 151-C:2, XV-a, as well as a direct provider of health care to individuals, including but not limited to physicians, dentists, podiatrists, chiropractors, optometrists, physical therapists, nurse practitioners and midwives. Registered nurses or licensed practical nurses or physician’s assistants engaged in delivery of health care and health care support in a hospital setting are not considered “providers” for the purposes of this report.
D. “Physician Hospital Organization (“PHO”)” means any organization or association involving a hospital and one or more providers as defined above, which is formed for the purpose of, or has authority to, negotiate with third parties for contracts for provision of health care services.

E. “Third Parties” means third party payors for health care services. This includes insurers, and health maintenance organizations; and individuals, entities or organizations for coverage of employees or other persons under direct payment of self-insurance programs.

F. “Parent” and “Subsidiary” are terms to be defined broadly so as to include, rather than exclude. These terms refer to any organization, including corporations, partnerships, associations, and not-for-profit entities, which is affiliated by contract, ownership, membership or equity interest with a PHO or its participants with respect to the delivery of healthcare services. This includes holding companies or service organizations affiliated with a hospital or other health care provider, and any organization participating with the PHO or its participants on a risk sharing or capitated reimbursement basis. Not included are organizations whose sole relation to a PHP or its participants is as a provider of services by contract or otherwise on a fee for service basis.
