*Re: Attorney General – Voluntary Notice of Third-Party Vendor Data Breach*

To Whom It May Concern:

Our firm was retained to provide support and compliance notification with regards to U.S.-based businesses and customers whose data may have been compromised as a result of a third-party vendor's data breach. This letter provides voluntary notification on behalf of Berkshire Production Supply, LLC d/b/a PTSolutions ("Company") of a recent data breach involving a third-party e-commerce platform that residents of Maryland used to purchase Company's products.

SignatureIT Ltd. (an Israeli-based company with U.S. subsidiaries) is a third-party that owns and operates e-commerce platforms that are often used by Company's customers to purchase Company products. SignatureIT recently notified Company of unauthorized access and interruption of these platforms. The data and systems (including Enterprise Resource Platform) owned and operated by Company are not a part of the e-commerce platforms and are completely separate and secure.

Even though there was no unauthorized access of Company systems, Company acted with caution and notified all known U.S. users registered with the e-commerce platform on or before November 16, 2023, of the third-party data breach to ensure each individual could take action to protect their information. This notice was provided electronically to said users on or about December 6, 2023. At the time of this notice, Company believes that approximately 38 residents may have had their personal information compromised as a result of the SignatureIT data breach. For your convenience, we have enclosed a copy of the Notice of Third-Party Data Breach that was sent to residents, without including any Personally Identifiable Information.

### **What Happened?**

On or about November 16, 2023, SignatureIT noticed unusual activity on their network, including a suspicious email sent to a multitude of users of its e-commerce platforms. According to a forensic preliminary report obtained by SignatureIT and subsequently shared, in part, with Company and/or its affiliates, the experts identified the Confluence collaboration platform as the probable penetration point into SignatureIT's system. Consequently, SignatureIT's e-commerce platforms were shut down.

### **What Information Was Involved?**

**\*\*Confidential Information Provided Voluntarily\*\***

Since all information was stored on SignatureIT servers, Company does not have the precise scope or content of the data that was accessed.

**What is the Company Doing?**

As a precautionary measure, notifications were sent to relevant regulators. These include the U.S. Federal Bureau of Investigation and to the Cybersecurity and Infrastructure Security Agency under the Cyber Incident Reporting for Critical Infrastructure Act, applicable U.S. state agencies, and the E.U. under the General Data Protection Regulation. Company has also notified the nationwide consumer reporting agencies. Although data stored in Company information systems was not accessed, and even though Company was not directly involved in this incident, Company continues to monitor this incident and its effect on its customer community.

If you have any further questions or need additional information, please feel free to contact me at

Sincerely,

Jennifer L. Morris  
Partner
