We have also enclosed hereto samples of the notifications made to the potentially impacted individuals, which includes an offer of free credit monitoring.

1. Nature of the Security Incident

On December 10, 2023, CellNetix became aware that it was the victim of a ransomware attack. CellNetix immediately engaged third-party forensic specialists to assist it with securing the network environment and investigating the extent of any unauthorized activity. After a careful review of documents and files potentially compromised by the threat actor, CellNetix determined on December 19, 2023, that employee information was potentially compromised. Therefore, out of an abundance of caution, CellNetix opted to notify all current and former employees from 2007 to present.

CellNetix found no evidence that personal information had been specifically misused; however, it is possible that the following information for current and former employees was potentially compromised:

2. New Hampshire Residents Notified

One (1) New Hampshire resident was potentially affected by this security incident. A notification letter was mailed to the potentially impacted individual on January 8, 2024, by first class mail. A sample copy of the notification letter is included with this letter.

3. Steps Taken

Although CellNetix is not aware of any evidence of misuse of personal information, CellNetix has extended to the potentially impacted individual an offer for free credit monitoring and identity theft protection through Sontiq. This service will include 12 months of credit monitoring, along with a fully managed identity theft recovery service, should the need arise. CellNetix has changed passwords, strengthened password requirements, and implemented stricter multi-factor authentication requirements.

4. Contact Information

CellNetix remains dedicated to protecting the sensitive information in its control. If you have any questions or need additional information, please do not hesitate to contact me at
