

Hello, I work for a company called Integrated Dynamics Engineering in Massachusetts. We had a data breach last month and have engaged a company called Kroll to send out notifications to all potentially affected individuals and to offer monitoring services. There is no evidence that any information was in fact compromised, but as a precaution we have issued the attached letter. Also at this time we are only aware of 3 individuals that are currently residing in New Hampshire.

Please let me know if you have any questions or need additional information.

Thank you,
Jeff

Notice of Data Breach

Dear <<first_name>> <<middle_name>> <<last_name>> <<suffix>>,

We are writing to tell you about a data security incident that may have exposed some of your personal information. We take the protection and proper use of your information very seriously. For this reason, we are contacting you directly to explain the circumstances of the incident.

What happened?

On Friday, May 19th, 2023, IDE was attacked by ransomware. It was detected during the attack which prompted IDE's Cybersecurity to shut down the Internet service. Aalberts, our parent company, and external specialists were assembled to analyze and start the restoration of our systems.

What information was involved?

At this time, we are not aware that there was any personal information compromised. However, there was some information on the server that could have been compromised including .

What we are doing.

As of June 16th, 2023 most of our operations have been restored. The IT infrastructure has been completely rebuilt, is more secure with added advanced security measures and is no longer connected to the old, infected IT system.

The forensic research project, with an external expert to analyze the background of the incident, indicates that the modus operandi used by the attacker was not to exfiltrate files and to publicize them, but only to encrypt local and network disks of our systems, as the malware found is typically used for these purposes.

To help relieve concerns and restore confidence following this incident, we have secured the services of Kroll to provide identity monitoring at no cost to you for two years. Kroll is a global leader in risk mitigation and response, and their team has extensive experience helping people who have sustained an unintentional exposure of confidential data. Your identity monitoring services include Credit Monitoring, a Current Credit Report, Web Watcher, Public Persona, Quick Cash Scan, \$1 Million Identity Fraud Loss Reimbursement, Fraud Consultation, and Identity Theft Restoration.

It is essential that each copy be legible, and display your name, current mailing address, and the date of issue.
