Re: Security Breach Notification

Dear Sir or Madam,

We are writing on behalf of our client, Medical Review Institute of America ("MRIoA"). MRIoA's prior notice to your office miscalculated the number of impacted individuals due to a clerical error and reviewing of an outdated notification log. After further review of the impacted population, MRIoA believes the correct number of New Hampshire residents is 421. We apologize for the confusion.

Please note that notifications were sent previously to the impacted individuals (MRIoA provided a copy of the letter sent to the impacted individuals in the prior notices to your office), and this notice is solely intended to provide the accurate number of impacted people. Further, we do not expect to have any more supplemental updates.¹

If you have any questions or wish to discuss this event further, please do not hesitate to call me at
or email me at

Sincerely Yours,

Spencer S. Pollock, Esq., CIPP/US, CIPM

¹ By providing this notice, MRIoA does not waive any rights or defenses regarding the applicability of New Hampshire law, the applicability of the New Hampshire's data event notification statute, or personal jurisdiction.
