Attorney General of New Hampshire  
State House Annex  
33 Capitol Street  
Concord, NH 03301-6397

Re: Recent Pfizer Data Breach

Dear General Ayotte:

I am writing to give you advance notice of a data privacy breach affecting our client, Pfizer Inc (“Pfizer”), and an estimated 34,000 current employees, former employees, health care professionals and other individuals. It appears that the breach developed when a Pfizer employee wrongfully removed copies of confidential information from a Pfizer computer system late last year. This was done without Pfizer’s knowledge or consent, in violation of Pfizer policy. The individual is no longer employed by the Company. Pfizer did not become aware that sensitive personal information had been removed until July 10, 2007.

The total number of affected individuals is still an estimate because there is a substantial amount of data to be analyzed; Pfizer has been working with outside consultants to review the exposed data quickly and thoroughly. Pfizer cannot yet estimate the number of affected individuals who reside in your State, but will provide that information as soon as possible. Pfizer will begin notifying those affected individuals who have been identified in the next several days. An exemplar copy of the notice letter is enclosed for your information.

At this point, Pfizer believes that the names and Social Security numbers and/or Taxpayer Identification numbers of all of the affected individuals were exposed. In addition, some of the following information was exposed for some of the affected individuals: home address; home and/or cellular phone number(s); fax number; e-mail address; credit card number; bank account number; passport number; driver’s license number; military identification number; birth date; signature; and reason for termination of Pfizer employment (if applicable).

So far there is no indication that any unauthorized person has used or is misusing the information that was removed from Pfizer. Nonetheless, as the enclosed letter explains, Pfizer has taken numerous steps to protect the security of the affected individuals, including notifying law enforcement, contacting the major national credit agencies and providing a full package of credit protection services and credit insurance for two years, free of charge.
